

Areas of Strengths

ADEK

(School Performance Report)

Feb 8-10, 2022

© 2022 Abu Dhabi Education & Knowledge

1. Students interact and collaborate well in a range of learning situations.
2. Students communicate their learning clearly
3. Students are enterprising.
4. Students can find things out for themselves and use technologies to support their learning
5. Critical thinking and problem-solving skills are common features of learning.
6. The majority of students are actively involved and sustain concentration in lessons
7. Students take increasing responsibility for their own learning and assessment of it
8. Students can work productively on their own. They do not need much guidance from teachers and use resources, including technology sensibly to support their work
9. Students are comfortable working together and have learned not only to listen to other students' views but also to analyze them and respond to them thoughtfully
10. All students in the primary, middle, and high phases showed Good skills in using learning technology. They could use different learning platforms to access and upload work and to choose the level of difficulty in the tasks they chose to do.
11. Most learning environments are enhanced by attractive displays of the students' artwork
12. Most teachers have a secure knowledge of their subjects and use this knowledge to provide thought-provoking lessons for students.
13. The majority of teachers motivate students to learn new things and expand their skills and understanding.
14. Teachers are equipped with technical skills to facilitate blended lessons; online lessons are consistently effective because teachers' pedagogy of how to do online teaching is secure.
15. Most lesson plans consider how activities are adapted and adjusted to ensure all students benefit and learn new skills
16. In all grades, teachers know their students' skills and mostly adapt lessons to ensure activities become more challenging as the lessons progress
17. The majority of teachers, in all grades, share learning objectives with students so that they are clear about what they are learning and how they will achieve the objective
18. Most teachers have high expectations of their students. The majority of teachers have positive and supportive interactions with students who in most lessons are motivated to learn
19. The majority of teachers use both closed and open-ended questions to provoke thinking
20. Teachers have Good knowledge of the strengths and weaknesses of individual students.
21. They provide well-focused challenges, support, feedback, and follow-up.
22. Teachers provide clear verbal feedback to students to help them overcome any misconceptions or doubts about the tasks they are tackling
